## ***Abbreviations***

CoRSU – Comprehensive Rehabilitation Services for people with disabilities in Uganda

MOH - Ministry of Health

PWD - People with disability

RC - Rehabilitation Centre

VM - Voluntary Mediator

## ***1. Foreword***

I am pleased to present to you the Annual Report of Namutamba Rehabilitation Centre for the year 2011. During this period Namutamba RC has continued its operations and has made great progress towards improving the welfare of children and youth with disabilities in the area of jurisdiction through its medical rehabilitation, follow up and community awareness programs.

As will be noted from the report, specific achievements that have been realised in the fulfilment of the Centre's objectives are highlighted together with the main challenges experienced.

I am glad for the achievements and the great success in the different programs carried out by the Centre and I am especially grateful for the generous support of our partners, who provide us with the necessary, technical and financial resources. There would not be much to achieve if there was no support for this precious work.

In a special way, we would like to recognise the support offered by Neukirchener Mission, especially for this year, they had to take the challenge of acquiring a new ambulance for the Centre as the one we had was really very old. We greatly acknowledge and are appreciative for the continued support from Liliane Foundation, Christian Blind Mission and Mityana District.

Special appreciation also goes to the Namutamba Rehabilitation Centre's Management and Board Members for their strategic guidance and also to the staff for their professional commitment to realising the organisation's objectives.

Betty Nakafunvu  
Administrative Assistant  
Namutamba RC

## ***2. Introduction***

The report provides details on the programs implemented by the Namutamba Rehabilitation Centre and the achievements registered in the year 2011. During the last year, the Centre continued its operations and many programs activities were implemented. This enabled the Centre to move a step further in the realisation of its objectives. The implemented programs covered five focus areas namely; medical rehabilitation, community sensitisation, outreaches and follows up, empowerment of children and youth with disability and strengthening the organisation's capabilities.

### ***2.1 About the organisation***

The Namutamba Rehabilitation Centre is a registered Non government organisation founded in 1995, by Mr. Burckhardt Schweinberger, a German Missionary, but being run by Neukirchener Mission in partnership with the Church of Uganda (Mityana Diocese) since 1997.

Namutamba RC's mandate is to contribute to uplifting the standards of people with disabilities in Uganda through complimenting to the childhood disability prevention and rehabilitation campaign/effort with particular emphasis on promoting the well fare of children and youth with disabilities.

### ***2.2 Vision***

To enable children and youth with disabilities live a better life through medical rehabilitation.

### ***2.3 Mission***

- To provide rehabilitation services as well as involving families and communities in the rehabilitation process of children with disabilities.
- To create a favourable atmosphere for their survival, success and security without discrimination through sensitisation.
- Namutamba Rehabilitation Centre focuses its activities on children and youth of 0-25 years.
- The degree of rehabilitation is in accordance with the Ministry of Health standards in Uganda.

### ***2.4 Objectives***

Objectives of Namutamba Rehabilitation Centre in accomplishing its mission include:

- To contribute to improved rehabilitation process and standards for children and youth with disabilities,
- To provide medical rehabilitation and appliances to children and youth with disabilities,
- To involve parents in the rehabilitation process of their children,
- To create awareness and responsibility in communities as regards people with disabilities.

The following services are offered:

- Admission of children with: Cerebral Palsy, congenital deformities, Cleft lip, Clubfoot, Drop foot, Hydrocephalus, Post burn contractures, Osteomyelitis and other disabilities.
- Counselling
- Taking children to hospitals and specialists and if needed for operation
- Pre-and post operative care (dressings)
- Physiotherapy
- Provision of appliances
- Distribution of Epilepsy drugs
- Informal school activities
- Sending people with disabilities for vocational training
- Fieldwork: regular outreach clinics, follow-up and home visits, community awareness, identifying people with disabilities, training of Voluntary Mediators.

### ***2.5 Goals***

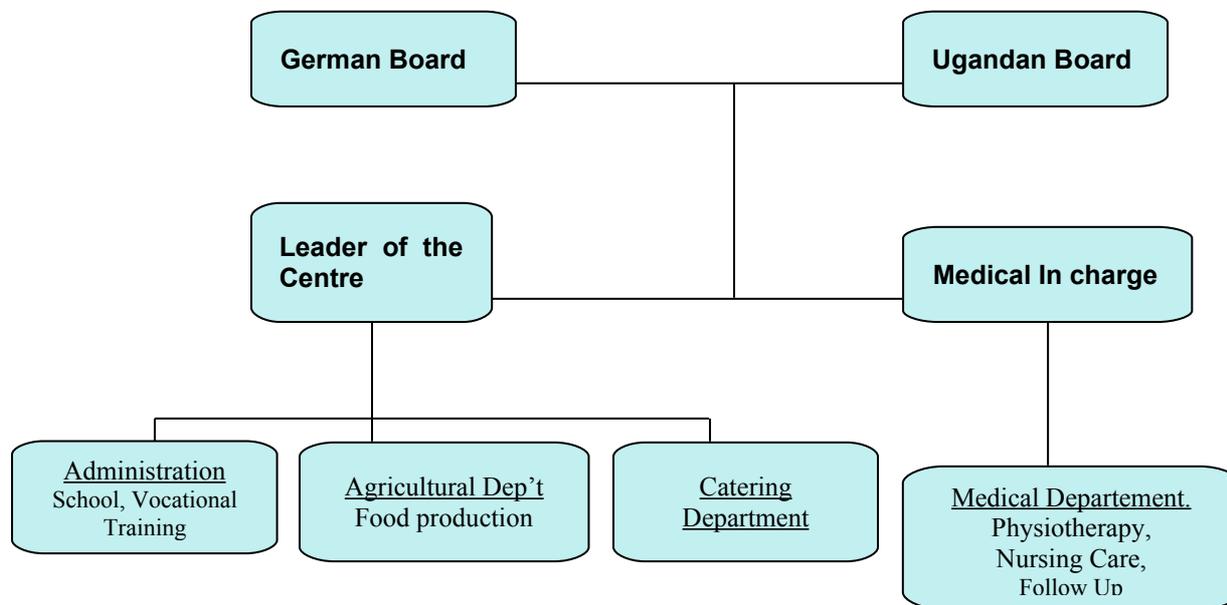

In addition to the above mentioned services, the goal is to strategically plan and to strengthen Namutamba RC's organisational capabilities, to increase the effectiveness and efficiency of the Namutamba RC (the Board and Management), to manage and grow the Centre in a sustainable and more significant manner.

## 2.6 Governance

The organisation has a Board of Directors comprised of eleven members, who are professionals in various fields and provide technical guidance on policy issues and strategic direction.

### Structure of Namutamba RC

## 3. Program achievements

In the period under review, the organisation continued to implement activities in its five program areas as indicated below.

### 3.1 Medical Rehabilitation

Namutamba Rehabilitation Centre puts emphasis on medical rehabilitation, quite a big number of children have been operated this year as seen in the statistical table below. This was done in situations where it was possible to prevent or to curb disabilities and complications.

Under this program area, the following activities were being implemented:

*Table 1*

Number of average clients for rehabilitation 2009- 2011

Average	2009	2010	2011
<b>Inpatients</b>	25	22	<b>19</b>
<b>Attendants</b>	6	6	<b>7</b>
<b>Outpatients monthly</b>	239	282	<b>302</b>
<b>Outpatients annual</b>	2873	3381	<b>3618</b>
<b>Operations</b>	105	108	<b>85</b>
<b>New clients</b>	640	685	<b>689</b>

### ***Pre and post operative care***

Children were admitted at the Centre and a rehabilitation plan was made with their family. Many of the children are referred to CoRSU Hospital for assessment, and if necessary, operations are thereafter done by orthopaedic and plastic surgeons.

After operations most children are in conditions that cannot be handled by their caretakers in villages because they need daily dressing, some require change of plaster; others need daily therapy while others need close observations by qualified personnel. For this reason they are first cared for at the Centre.

### ***Physiotherapy***

Most of the children admitted at Namutamba RC attended physiotherapy, either for prevention of disabilities or for functional improvement after operations.

The Centre has increased on the number of children admitted with Cerebral Palsy, this was done to adjust on the way these children are cared for and the way their parents perceive them. Parents often neglect them and don't follow the medical advice given because they see no immediate improvement. The medical team has taken the initiative of treating and monitoring these children and to work together with their parents for a reasonable period of time in which gradual, but sure improvements have already been reported by parents who were monitored last year.

### ***Provision of appliances***

Appliances (crutches, splints, wheelchairs etc.) were provided to people with disabilities where it is necessary to give support in movement or prevent the occurrence of a disability. As they are expensive and costly so parents and guardians were requested and encouraged to contribute to their children's appliances.

*Table2*

*Number of new assessed clients treated in 2009- 2011*

<b>Type of disability</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>
<b>Cerebral Palsy</b>	93	106	<b>173</b>
<b>Epilepsy</b>	244	289	<b>238</b>
<b>Osteomyelitis</b>	18	23	<b>20</b>
<b>Cleft lip, Cleft palate</b>	12	7	<b>9</b>
<b>Clubfoot</b>	44	28	<b>31</b>
<b>Post Burn Contracture</b>	16	10	<b>7</b>
<b>Others</b>	213	232	<b>204</b>
<b>Total</b>	640	685	<b>689</b>

### **3.2 Community sensitisation**

Under this program area, the following activities were being implemented;

#### ***Disability screening in schools***

The medical team of Namutamba RC continued with the program of disability screening in schools this year. This has been proved to be important as teachers and students get to know the different disabilities and report any hidden client either among them or in their communities.

#### ***Sensitisation at Teachers training colleges***

We went on with the program of training grade three teachers the basics of children with special needs. In this way, teachers are trained on how to handle children with disabilities once they find them in class and how to help them. Students have also been hosted for inspirational talks at the Centre which will boost their morale in taking care of children with disabilities.

#### ***Activities with the Voluntary Mediators***

We organised community meetings and teachings to focus on needs of PWD's, this is mainly done by our trained Voluntary Mediators together with the Field coordinator. A Refresher workshop was conducted with all Voluntary Mediators at Mityana. Further evaluation of the VM's was done to monitor the activities carried out.

### **3.3 Outreaches and follow-up**

Field work and outreaches were done on a regular basis by the medical team of Namutamba Rehabilitation Centre. The team carried out field work in Kiganda, Kiyuni, Kassanda, Zigoti, Maanyi, Nabwendo, Bukomero and Kiboga. This enables the Centre to reach out to those who are unable to come to the Centre for treatment and rehabilitation.

Mityana District supported the Outreach Clinics by providing and facilitating qualified personnel (Psychiatric Nurse), who is very helpful in treating clients with Epilepsy in all the outreach clinics.

Ministry of Health through the Primary Health Care of Mityana District also supported the work at the Centre by providing some funds which enabled the Centre to cover part of the costs for outreaches and medical expenditures.

### ***Epilepsy program***

Regular clinics were held in Namutamba, Kiganda, Kassanda, Zigoti and Maanyi and Kiyuni.

Our main goals are:

- Education about the disease (this is to clients and attendants)
- Provision of anti-epileptic medicine
- Monitoring clients on long-term basis

Quite a big number of children got free from fits after completing their long term dose, while others still have to continue for some years or throughout their lives.

Clients were requested to at least make a contribution of 2000-4000 US\$ for the medicine they got for 2 months.

*Table3*

*Clients on Epilepsy Treatment*

<b>Areas</b>	<b>2009</b>	<b>2010</b>	<b>2011</b>
Namutamba	117	119	<b>134</b>
Kassanda	139	181	<b>226</b>
Kiganda	173	173	<b>171</b>
Zigoti	63	109	<b>88</b>
Kiyuni	-	133	<b>112</b>
Maanyi	108	97	<b>100</b>

### ***Follow- up and Home visits***

The Follow-up program of discharged clients was intensified; clients are followed- up to see how they adopt to daily life after rehabilitation at Namutamba RC, and to advise accordingly depending on the nature of disability. Many parents are committed and support the rehabilitation process after discharge from Namutamba RC.

### ***3.4 Empowerment of children and youth with disability***

#### ***Vocational training***

Some youth with disabilities were offered a chance to go for vocational training. For the year under review we had two students in mechanics and two in tailoring. The mechanics students successfully finished their course and we hope they will be able to sustain themselves in all aspects of life; the tailoring students still undergo training.

#### ***Education***

The Centre has a teacher, so children at the Centre have a chance of studying. Education services are mainly informal but keep children's mind awake.

There are also some children whose formal education were partly funded and were able to go to other schools.

### ***Hand crafts***

All children at Namutamba RC were able to learn some crafts; they do weaving, knitting, making mats and necklaces, designing and others. This is done every day of the week in the afternoon.

### **3.5 *Strengthening the organisation's capabilities***

#### ***Strategic planning***

The Centre has embarked on strategies that will ensure sustainability in the long run and has employed qualified personnel to ensure proper strategic management.

#### ***Staffs professional development***

Medical staff attended courses for their professional development; however staffs especially in the medical department are continually taught and given insights on the improvement of the quality of services towards PWD's.

#### ***Income generating project***

For the year under review we had a tree planting project, over 500 trees were planted at the land of Namutamba RC.

#### ***The workshop***

The workshop provided the Centre with necessary equipments and made furniture for the customers in the community.

#### ***Membership to other organisation***

Namutamba Rehabilitation Centre is networking with many other related organisations such as CoRSU Rehabilitation Hospital, Katalemwa Cheshire Homes, Ministry of Health, UPMB and others.

## ***4. Departmental Highlights***

### ***4.1 Highlights from the medical department***

The Centre had a joint outreach with Child Fund International to find out a way the Centre can collaborate with this agency.

Health teachings for children and attendants were intensified at the Centre on a regular basis.

### ***Highlights from the Physiotherapy***

These are the achievements in the Physiotherapy department in the year 2011:

After the training of a Physiotherapist in Neurodevelopment Therapy (NDT/ Bobath, 8 weeks basic course) the management of CP children at the Centre changed to a block system. Children with CP and their caretakers are admitted at the Centre in groups of less than 10 for intensive therapy and training for two weeks. They are then discharged and a plan made for another block.

This has been integrated with the Hambisela training program after a one week course done by a physiotherapist and social worker. In this program caretakers or parents are given basic training about the condition and how to manage their children in day to day life.

Due to an increase in the number of children for Physiotherapy, the Physiotherapy room was changed and is done in the main hall now.

Some equipment was made from the RC wood workshop such as benches, wood blocks, and rollers. Wedges, exercise mats and cushions were also acquired.

### ***Challenges***

- Increased numbers of children who need therapy.
- Several clients miss appointments and this interrupts the continuation of the treatment plan.
- Follow up for some children is not possible due to limited human and financial resources.
- Some children who need equipment do not get it due to financial issues.

### ***Plan for the Year***

- Block system for treatment of CP children
- Looking for funds to provide equipment to children

## *Highlights from the Field coordinator/ Social worker*

### *Achievements*

Over 116 homes of clients were visited in Mityana, Mubende, Kiboga and Kyankwanzi District for follow up and necessary plans were made according to the need.

There were 23 active Voluntary Mediators in our area of jurisdiction which were well supervised by the Field coordinator and assigned tasks of helping certain clients. This was well done! Voluntary Mediators were also given identity cards, which has eased their work in the community.

New clients were identified during field work by either the Field coordinator or by the Voluntary Mediators. These clients were advised accordingly, that is; some were referred to the outreach places while others brought to the Centre for rehabilitation immediately.

### *Challenges*

- Breakdown of the motorcycle due to wearied parts, this interfered with the day targeted program for home visits.
- Less possibility to teach parents on making local appliances which could be useful in doing exercises at their homes, for example: parallel bars, standing frames and others.
- Big numbers of clients for follow up in our catchment areas. If these clients are not followed up, there is no continuity for rehabilitation.

### *Plan for the Year*

- Home visits for children included in intensive CP treatment
- Networking with VMs and other organisations
- Start parent groups

### **4.2 Agriculture department**

The Centre has its own garden contributing (greens, beans, cabbage, sweet potatoes, tomatoes, matooke, fruits and others) to the food bought to have a balanced nutrition for the children while at the Centre.

The Centre has a garden manager who plans, participates in and supervises the garden work.

Attendants and youth with disabilities are actively involved in foods production and they do it promptly.

The department was also actively involved in the tree planting project that was under- taken by the Centre to ensure future sustainability. Through the agriculture department, the Centre has planted over 500 trees. The Centre received a cow from former clients' association.

### *Plan for the year*

The department will increase on food production for the Centre; this will be done by cultivating all the available land and the use of natural fertilisers like cow dung and other plant manure. The Centre will also use more of the land available.

Attendants will be requested to be resourceful in gardens so as to cultivate a larger piece of land for food production.

### **4.3 Management**

#### ***Highlights of 2011***

##### *Staffing*

The Centre was run by twelve employed staffs supported by 3 medical staffs from Germany. In the year under review, the Centre employed four new staff for the following positions; Social worker, Carpenter, Weekend Cook and Gardener.

A German volunteer worked part time at the Centre and supported teaching and leisure

activities of children and a German carpenter worked as volunteer at the Centre.

The Administrative Assistant started full time work at the Centre.

The Leadership of the medical department was assigned to the Physiotherapist last year.

##### *Administration*

An information day took place on the 4<sup>th</sup> of August at the Centre with the main purpose of fundraising for the car (ambulance), over 25 guests attended.

The Centre received the new car which was donated by Neukirchener Mission in September. This has resulted into great reductions in repair costs!

The Management of the Centre took a larger part in strategic thinking for the Centre so as to make a 3 years strategic plan. The Management is also continuously working on a future concept for the Centre in order to ensure self-sustainability.

The Centre also acquired a new computer for the Administrative Assistant's office. The accounting software was introduced and adopted which makes it easy to tress all accounting records for the Centre.

There was increase in the effectiveness of human resources as a result intensified staff monitoring and supervision, this was done by quarterly reviews job description and reports.

### *Challenges*

- There is challenge of less participation of stakeholders in planning for sustainability of the Centre and lack of support by other organisations.
- Increasing medical costs whereby families are not able to reasonably contribute towards the medical rehabilitation of their children.
- Staffs demand for pay- raise due to inflation and rampant price fluctuations.

### *Plan for next year*

- The Centre will complete and launch a 3years strategic plan
- The Centre will make sure that new Board Members are brought on board and that they are involved in the Centre activities.
- There is a plan to renovate the building, that is; kitchen, rooms and dining hall.
- The Centre plans to increase closer network and partnership with other organisation
- The Centre will try to lobby for support from corporate organisation through their corporate social responsibility approaches. The Centre will increase in public relations.

## ***5. Financial report***

This report covers the period January 2011 to December 2011. The financial report shows the internally and externally audited books of account for the Centre.

### ***Income***

There is still a need to expand the income base of Namutamba RC, through various avenues like local and international donors, raising contribution fees from clients, investing in viable projects for self-sustainability.

MOH through Primary Health Care, Mityana District has continued to support Namutamba RC in meeting some outreach costs. This year it contributed 3.2% of the organisation's gross income.

During the year parent's contribution was emphasized and contributions rose 7.5% of the gross income. We will be making gradual increments to patient's contribution so that those that are able to pay will compensate for those who are very poor.

### ***Expenditure***

In the year under review, there was increment in expenditure blocks especially in the welfare (food and living expenses), in the medical cost (hospitalisation, appliances and drugs) and in the transportation costs. This was as a result of increasing prices for items and inflation.

The members of the Board present their report together with the audited financial statements of the Centre for the year ended 31. December 2011.

**NAMUTAMBA REHABILITATION CENTRE  
REPORT OF THE DIRECTORS  
FOR THE YEAR ENDED 31 DECEMBER 2011**

The directors present their report together with the audited financial statements for the year ended 31 December 2011, which disclose the state of affairs of Namutamba Rehabilitation Centre.

**1. PRINCIPAL ACTIVITY**

Namutamba Rehabilitation Centre (NRC) was established in 1997 with the objective of providing rehabilitation services to people with disabilities of up to 25 years of age in Mityana Diocese (Kiboga, Mityana and Mubende Districts). The NRC is registered as an NGO (Registration No 3171) and is working under the Church of Uganda with support of Neukirchener Mission (Germany) and other donors

**2. RESULTS**

The results for the year are set out on page 5.

**3. DIRECTORS**

The directors who served during the year and to the date of this report were:

Hon. Dr. Gordon Katende Sematiko	Board Chairman
Mrs. Christine Kajumba	Vice Chairman
Rev. Can. Stephen Kaziro	Board Member
Mr. Dickson Kiwanda	Board Member
Mrs. Samalie Kataza	Board Member
Mr. Frederic Malumba	Board Member
Mr. Elijah Kayima	Board Member
Sr. Lydia Lehmann	Board Member
Sr. Ute Rüdiger	Board Member
Mr. Simon Amanya	Board Member

**4. AUDITORS**

The auditors, GTX and Company Certified Public Accountants, who were appointed by the Board during the year, have expressed their willingness to continue in office.

By Order of the Board

**Secretary**

*As of January*  
..... 2012

## REPORT OF THE INDEPENDENT AUDITORS TO THE DIRECTORS

We have audited the accompanying financial statements of Namutamba Rehabilitation Centre, which comprise the Income and Expenditure Account for the Year ended 31<sup>st</sup> December 2011, Statement of Affairs as at 31 December 2011, statement of changes in Fund balance and statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information as set out on pages 5 to 14.

### Directors' responsibility for the financial statements

The Organisation's directors are responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards and in a manner required by the Namutamba Rehabilitation Centre and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

### Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate for the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

### Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of Namutamba Rehabilitation Centre as at 31 December 2011, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Namutamba RC is a non-governmental and non-profit making organisation and relies on donations.

We appreciate any contribution in supporting the work of the Centre.

The main support comes through Neukirchener Mission and Liliane Foundation. The Centre receives some income through Mityana District (PHC-Funds), parent contributions and other donations.

For any contribution, donation and support please use the account number below;

<i>Account-No</i>	<i>0121 064 259 901</i>
<i>Branch</i>	<i>Stanbic Bank of Uganda Limited, Kampala Road, Kampala</i>
<i>BIC</i>	<i>SBICUGKX</i>
<i>Name</i>	<i>Namutamba Rehabilitation Centre</i>

## 6. Networking

Namutamba RC is sincerely grateful to the following organisation and individuals it networks with, namely;

- CBM-Christian Blind Mission: for good cooperation and paying operation fees for children operated at CoRSU Hospital
- CoRSU Hospital: for close networking in the whole process of rehabilitation of our clients
- Katalamwa Cheshire Home: for cooperation and providing appliances
- Child Fund International for the contribution to the car acquisition
- Children a Chance for the children for donation of appliances
- Ministry of Health: for support in PHC and medical services
- Health sector of Mityana District: for networking in PHC and other areas
- Liliane Foundation Netherlands: for supporting children in medical treatment, getting appliances, schooling, and vocational training and resettlement tools.
- Neukirchener Mission: for financial support, prayers, management and for the car donation
- GMMT (German Medical Missionary Team) for the great cooperation and support by sending staff and volunteers and for contributing to the acquisition of the car (ambulance) and for all the financial donations.
- Church of Uganda: for good cooperation with Mityana Diocese
- UPMB: for all information and logistic support for the Centre
- All donors who support the NRC financially and with prayers

We also want to thank the Board in Uganda and in Germany for the good cooperation and communication during the last year.

**THANK YOU VERY MUCH!!!!**
